

Eric Martinez

Period 2

On the project that I will be working on I am going to work alone, my project will be about me and have information my experiences, skills, plans for the future, and the things that I enjoy in life. My project will be special because it is about me and I know there isn't a website about me, I also plan to be able to come to it and use it or maybe fix it later on in the future. I will build my project on atom and will use HTML CSS and JavaScript. I plan to challenge myself by adding this onto my project that I haven't been good in using and stylizing it in a way that I haven't in the past.

Milestone 1: create a home page

Milestone 2: begin to add color, backgrounds, pictures to this page

Milestone 3: download bootstrap and other files that I'll need for carousel

Milestone 4: have wording and sections in the page

Milestone 5: look for pictures and gif and fonts that I'll use in my pages

Milestone 6: create other pages that are going to be a part of the project like (about me, experiences, things I like, future plans, and contact me)

Milestone 7: begin to make them links and be able to click on them

Milestone 8: make sure I can switch from one page to another on all pages

Milestone 9: begin to work on (about me) page

Milestone 10: type up my information that's going to be on my page

Milestone 11: begin on a carousel and pictures

Milestone 12: completed the (about me) page

Milestone 13: have tab bars for all pages working

Milestone 14: begin on the (experience) page

Milestone 15: add gif to page or animations

Milestone 16: complete that page

Milestone 17: start on the (things I like) pages

Milestone 18: start (future plans) page

Milestone 19: start (contact me) page

Milestone 20: complete all pages
